SUBJECT: Reinz Non-asbestos Gasket Material

After looking over the Reinz folder on non-asbestos gaskets which you gave me, the Reinz non-asbestos materials AFM 32 and AFM 35 seem to be materials which should be suitable for Copeland's compressor application.

Can you obtain some nominal .030 inch (.75mm) thick sheets of these materials on which we could run our evaluation tests. Six sheets about 12x14 inches (305 x 355mm) in size should suffice. Also, can you get a comparative price of these non-asbestos materials to the currently used Reinz Thermolit asbestos material.

Kurt List
