

1937
INDEX

Volume I

A

Absenteeism: Facts Revealed from Studying the Causes of Absenteeism (Curtis), 76-80.
Accident Prone Employees: See Personal Factors.
Accident Statistics: Analysis of Accidents, 228.
The Function of the U. S. Bureau of Labor Statistics in the Field of Accident Statistics, 463-465.
Graphic Method of Portraying Accidents (Spitzer), 264-266.
How to Make Statistics Interesting and Useful (Filmer), 396-398.
Keeping a Record of Accident Costs (Goldstine), 288-290.
Report of Accident Experience Exchange (Braun), 431-435.
What are the Best Ways to Keep and Use Accident Records? 176-180.
Acids: Protective Equipment in the Handling of Acids by the Consumer (Eberhardt), 207-209.
Safe Handling of Portable Acid Containers Such as Carboys, Drums, Jugs, Flasks (Stratton), 201-204.
Safe Storage and Distribution of Acids Within Industrial Plants (Turgeon), 204-206.
See also Chemicals.
Aeronautical Section: Minutes, 211-219.
Officers, 211.
Aeronautics: Cleveland Airport Radio Traffic Control (Berry), 218-219.
The Importance of Flight Dispatching in Air Transportation (Fritz), 211-213.
Planning for Safety (Gazley), 213-217.
Rating of Instructors (Cole), 217-218.
After Work Accidents Session: 33-40.
After Work Accidents: See also Public Safety.
Agricultural Safety Session: 41-49.
Ainsworth, C.: Interesting Phases of Construction Safety Code Work, 300-302.
Air Conditioning: Safety Control in Air Conditioning (Hillen), 573-576.
Aldrich, H. J.: Safety Kinks in the Food Industry, 322.
Allen, T.: Safety Program for the Reduction of Accidents in Coal Mines in Colorado, 404-408.
Ames, F. E.: The Value of Safety Posters in Accident Prevention, 357-359.
Ammonia: Protective Equipment in the Handling of Acids by the Consumer (Eberhardt), 209.
Anderson, A. L.: Can the Safety Engineer Make Effective Motion Pictures?
What One Company Has Done, 497.
Annual Meeting of Members: 11-30.
A. S. E.—Engineering Section: Minutes, 221-224.
Officers, 221-222.
Augustus, E.: How Can the Industrial Nurse Help Maintain Employee Interest in the Safety Program? 328-332.
Automotive and Machine Shop Section: Officers, 225-226.
Automotive and Machine Shop—Power Press Sections: Minutes, 225-247.
Awards: See Contests; Rewards.

B

Babb, L. V.: The Nurse's Part in Getting Injured Men Back on the Job, 323-326.
Badger, O. B.: Habit Formation Through Supervision, 526-527.

Baker, R. J.: The Advancement of Safety in the American Steamship Industry, 343-345.
Bakeries: See Food Industry.
Banash, J. I. and Reinhard, H. F.: Welding and Cutting Fires are Preventable, 385-387.
Banquet: 31-32.
Barrett, G. J.: Iron Ore Mining, 411-412.
Beil, P.: Why the Worker is Not Responsible, 377.
Berry, J.: Cleveland Airport Radio Traffic Control, 218-219.
Bigler, H. C.: Developing Safe Workers Through the Employment Office and Job Training, 226-229.
Blakeslee, H. N.: A Statistical Review and Forecast of the Petroleum Industry, 519-520.
Blanpied, E. A.: Safe Practices in Use of Heavy Construction Equipment, 295-297.
Bogges, H. W.: Industry's Responsibilities in Community Safety, 490-493.
Boilers: What the Safety Man Should Know About Steam Boilers and Steam Lines (Fish), 157-161.
Bonus Plans: See Rewards.
Bowen, Capt. W. O.: Training of Officers, 368-370.
Boxboard Mills: See Paper Industry.
Braun, F. W.: Report of Accident Experience Exchange, 431-435.
Bridges: Safe Practices in Use of Heavy Construction Equipment (Blanpied), 295-297.
Brooks, Dr. A. L.: What the Industrial Nurse Should Know About Occupational Diseases, 334-337.
Brown, P.: The Nurse's Part in the Sickness Prevention Program, 337-340.
Buckle, P. F.: Adequate Accident Investigation and the Need for Suitable Discipline Before the Accident Occurs, 597-599.
Bulletin Boards: The Use of Bulletin Boards in the Safety Program, 198-199.
Bungenstock, A. G.: Getting Facts and Keeping Records on After Work Accidents, 33-35.
Burden, O. R.: The Handling of Pipe as it Applies to Oil and Gas Pipe-Line Work, 504-511.
Burns: Industrial Burns and Their Treatment (Mudd), 81-83.

C

Calenders: See Paper Industry.
Carbon Dioxide: Accidents Involving Carbon Dioxide and Their Prevention (Goosman), 564-566.
Carboys: See Acids.
Cement and Quarry Sections: Minutes, 249-270.
Cement Industry: Analysis of Accidents in the Cement Industry (Curtis), 250-252.
Facts Revealed from Studying the Causes of Absenteeism (Curtis), 76-80.
Cement Section: Officers, 249.
Chemical Industry: Safety in Chemical Laboratories (Ritter), 272-274.
Safety in Chemical Pilot Plants (Tilden), 275-279.
Safety in the Chemical Production Plant (Zoerb), 280-284.
Chemical Section: Contest, 275.
Minutes, 271-284.
Officers, 271-272.

Twenty-Sixth National Safety Congress

Chemicals: Protective Equipment in the Handling of Acids by the Consumer (Eberhardt), 207-209.
 Safe Handling of Portable Acid Containers Such as Carboys, Drums, Jugs, Flasks (Stratton), 201-204.
 Safe Storage and Distribution of Acids Within Industrial Plants (Turgeon), 204-206.
 See also Acids.
 Colahan, K. A.: How to Inspect a Factory Elevator for Safety, 183-187.
 Cole, E. B.: Rating of Instructors, 217-218.
 Colors: Painting Machines on Which Repetitive Operations are Performed, 246.
 Committees: How Can Unsafe Conditions Be Uncovered, 173-174.
 Standard Safety Committee Procedure, 348-349.
 What Part, if Any, Does the Safety Committee Have in the Training Program, 196-197.
 Community Safety Organization Session, 51-58.
 Community Safety: See also Public Safety.
 Compressed Air: What the Safety Man Should Know About Compressed Air Systems, 161-166.
 Construction Industry: Interesting Phases of Construction Safety Code Work (Ainsworth), 300-302.
 Methods Used to Present Safety Movement to Employees (Jessup), 302-304.
 Practical Engineering as Applied to Safety in Construction (Crandell), 304-306.
 Safe Practices in Use of Heavy Construction Equipment (Blampied), 295-297.
 Safety Training for the Construction Foreman (Curtis), 297-300.
 Construction Section: Minutes, 285-306.
 Officers, 285-286.
 Contests: Chemical Section, 275.
 Contests Give Results, 317-318.
 Marine Section, 370.
 Metals Section, 396.
 Methods Used by A Sand and Gravel Company to Win the National Safety Award (Koop), 261-262.
 Paper and Pulp Section Safety Contest, 471-473.
 Petroleum Section, 520.
 Place of Contests in the Safety Program, 153-155.
 Public Utilities Section, 549.
 Rubber Section, 578-579.
 Cooner, J. D.: Specific Accidents and Hazards and Their Elimination in Anthracite Mining, 409-411.
 Costs and Money Savings: The Dollars and Cents Side of Safety (Hall), 589-590.
 Craig, J. D.: What the Safety Man Should Know About Processing Kettles, 166-172.
 Crandell, F. J.: Practical Engineering as Applied to Safety in Construction, 304-306.
 Curtis, A. J. R.: Analysis of Accidents in the Cement Industry, 250-252.
 Facts Revealed from Studying the Causes of Absenteeism, 76-80.
 Curtis, M. L.: Safety Training for the Construction Foreman, 297-300.

D

Deadman, W. W.: Let's Go Into This Accident, 253-256.
 Dermatitis: See Health Hazards.
 Dibsdale, S. S.: Point of Operation Guards for Metal Working Machines, 236-237.
 Dickinson, S. C.: Typical Public Utility Accidents and the Lessons Learned From Them, 554-555.
 Discipline: Disciplinary Measures for Violation of Safety Rules, 470.
 Penalties for Violation of Rules (Simpson), 455-460.
 Dowd, A. S.: Data on 1936-37 Paper Industry Safety Contest, 472-473.
 Drivers and Driving: See Traffic.
 Drums for Acids: See Acids.
 "Dry Ice": Accidents Involving Carbon Dioxide and Their Prevention (Goosman), 564-566.

Dusts: Combating the Dust Problem in the Wood Products Industry (Sissman), 612-614.
 The Doctor's Part in Controlling Dust Hazards (Lazenby), 95-98.
 The Engineer's Part in Eliminating Dust Hazards (Johnson), 92-95.
 Methods for Protection Against Silicosis, and When They Are Justified (Harrington), 290-295.
 What Industrial Dusts are Harmful? Why? (Sayers), 85-92.
 Work of the National Silicosis Conference (Starr), 257-260.
 Dye, B. T.: Planning Your Safety Program, 394-395.

E

Eberhardt, E. G.: Protective Equipment in the Handling of Acids by the Consumer, 207-209.
 Economics of Safety: See Costs and Money Savings.
 Education of Workmen: The Art of Giving Complete Instruction (Martin), 521-526.
 Employee Training and Its Relation to Accident Prevention on American Railroads (Hale), 590-592.
 Five Steps Necessary to Instruction, 619.
 Habit Formation Through Supervision (Badger), 526-527.
 Instructional Methods in Accident Prevention in Pulp and Paper Industry, 451-455.
 Is There any Relation Between Safety Training and Safety Rules? 195-196.
 Is Training a Vital Factor in Effective Safety Work (Pepper), 256-257.
 Safety Training for the Construction Foreman (Curtis), 297-300.
 Should Visual Methods be Employed in the Training Program? 197-199.
 What are the Objectives of Safety Training, 193-194.
 What is Safety Education? 180-181.
 What Part, if Any, Does the Safety Committee Have in the Training Program, 196-197.
 What Training Methods are Most Effective? 196.
 What Types of Training Are the Most Beneficial to Industry? 194-195.
 Who Shall be Trained, 19+.
 Electrical Industry: How to Make a Safety Inspection of Electrical Equipment (Hasskarl), 187-191.
 Safety in Connection With Flood Emergencies as it Relates to Electric Operation (Salsbury), 542-545.
 Electricity: Following the Plant Electrician (Wickham), 603-605.
 How to Make a Safety Inspection of Electrical Equipment (Hasskarl), 187-191.
 See also Static Electricity.
 Electroplating: See Plating.
 Elevators: How to Inspect a Factory Elevator for Safety (Colahan), 183-187.
 Employees' Meetings: Compulsory Attendance at Safety Meetings, 142-143.
 Executive Training Meetings, 227-228.
 Employees Training: See Education of Workmen; Safety Training Session.
 Engineering: Engineering and Industrial Accident Prevention (Holbrook), 243-224.
 Practical Engineering as Applied to Safety in Construction (Crandell), 304-306.
 Engineering Revision: Designing for Safety (Rockhoff), 237-238.
 Developing Safe Workers in Metal Working Industries Through the Regular Supervisory Force (Hunter), 233-234.
 Executives: See Management.
 Exhibits: Exhibitors at the 26th National Safety Congress and Exposition, 581-583.
 Explosions: Explosion Hazards of Common Flammable Liquids (Miller), 67-70.

F

- Farm Safety: Farm Fires and Their Prevention (James), 46-47.
 A Program for Farm Safety (Seagraves), 47-49.
 Urgent Need for Program on Agricultural Accident Prevention (Price), 41-42.
 What Are the Outstanding Causes of Agricultural Accidents? (Mohler), 42-45.
 See also Agricultural Safety Session.
 Fatigue: Fatigue in Its Relation to Accident Prevention (Garner), 569-573.
 Prevention of Accidents in Repetitive Operations (Thomas), 243-244.
 Fennell, D. L.: Address of Welcome for Kansas City Safety Council, 11.
 Ferguson, R. H.: Visual Education Methods, 229-232.
 Fernandez, A. C.: Handling Safety in a Large Mexican Mine, 426-428.
 Filmer, W. T.: How to Make Statistics Interesting and Useful, 396-398.
 Fire Prevention: Causes, Prevention and Control of Petroleum Fires (Howell), 514-518.
 Combating the Dust Problem in the Wood Products Industry (Sissman), 612-614.
 Explosion Hazards of Common Flammable Liquids (Miller), 67-70.
 Farm Fires and Their Prevention (James), 46-47.
 Spontaneous Ignition and Its Prevention (Nuckolls), 63-66.
 Static Electricity as a Fire Hazard and Its Control (Turkington), 59-63.
 Welding and Cutting Fires are Preventable (Banash and Reinhard), 385-387.
 Fire Prevention Session: 59-70.
 Fish, E. R.: What the Safety Man Should Know About Steam Boilers and Steam Lines, 157-161.
 Flammable Liquids: Explosion Hazards of Common Flammable Liquids (Miller), 67-70.
 Flasks: See Acids.
 Flood Emergencies: Safety in Connection With Flood Emergencies as it Affects Telephone and Telegraph (Ledwith), 547-548.
 Safety in Connection With Emergencies as it Affects Water Utilities (Webb), 545-546.
 Safety in Connection With Flood Emergencies as it Relates to Electric Operation (Salsbury), 542-545.
 Floors: Preventing Slippery Floors, 321.
 Tripping Hazards in Paper Mill Machine Rooms, 476-477.
 Flour Mills: See Food Industry.
 Food Industry: Accident Reduction With a Planned Maintenance System—Bakeries (Hildebrand), 310-313.
 Eliminating Accidents Peculiar to Women in the Food Industry (McKeon), 319-322.
 Safety and Sanitation and Its Relation to Food Products (Kampe), 317-319.
 Safety Kinks in the Food Industry (Aldrich), 322.
 What Accident Prevention Means to the Flour Milling Industry (Warkentin), 313-316.
 Food Section: Minutes, 307-322.
 Officers, 307-309.
 Forbes, J. J.: Specific Accidents and Hazards and Their Elimination in Mining From the Viewpoint of the United States Bureau of Mines, 417-422.
 Foremen: Developing Safety Workers in Metal Working Industries Through the Regular Supervisory Force (Hunter), 232-234.
 How Can the Foreman Most Effectively Meet His Responsibility? (Roberts), 608-610.
 Safety Training for the Construction Foreman (Curtis), 297-300.
