ATTN: Mr. T. Jefopoulos

Dear Mr. Jefopoulos:

Thank you for sending me a letter regarding the
asbestos free nature of #2131, Talc.

The letter was sent in response to an inquiry made
by me concerning a warning statement and/or label needed
for each bag of the Talc I have on hand.

After reading the letter sent me, our lab director,
Dr. Subbaratnam, called the Illinois Dept. of Labor, Toxic
Substance Division, to reverify if Talc was still on the
list of "toxic" substances. He has been told that it is
still on the list.

Therefore, a warning label/statement placed directly
on each bag of Talc will still be required by us on any
future deliveries. The material we have on hand will be
labeled by us. Dr. Subbaratnam advised me that this label
must read exactly what is stated in Section V - Health
Hazard Data, of the Material Safety Data Sheet for non-
asbestiform Talc.

JUN 18 1984

If you have any further questions, please call me,
Dr. Subbaratnam or the Ill. Dept. of Labor, Toxic Substance
Division. Talk with Paul Fudacz at (217)782-4102.

Sincerely,

Donna J. Schleicher
