Dr. P. A. Kehoe, Medical Director
Kettering Laboratory
College of Medicine
Cincinnati, Ohio

Dear Doctor Kehoe:

Your name was given to me by J. S. Maynard of the
Ethyl Corporation, as the person to contact in re-
gard to obtaining a supply of tetraethyl lead.

I plan to do some experiments on lung tissue and
I would require approximately 30 cc to conduct this
work.

Please advise me if it is possible to obtain this
amount of tetraethyl lead.

Sincerely yours,

W. P. Pelz
