October 29, 1974

PCB Canada

Bill C-25

First Reading 10/11/74

H. S. Bergen - B28L

J. Buchanan - 5080

T. L. Gossage - B28L (w/attached)

W. Withers (w/attached)

W. B. Papageorge

C. Paton

John Buchanan sent copies of the above.

1. The bill is not specific to PCB but obviously encompasses its use.
2. I am concerned by the definition of "substance", page 2, in relation to recent Canadian work on "natural" chlorination of Biphenyl to PCB in nature.
3. With this reservation, the bill appears to be a general instrument to give the Federal government fairly broad powers of control and setting up the method of operation.
