Dr. R. A. Kehoe,
Department of Physiology,
College of Medicine,
University of Cincinnati,
CINCINNATI. Ohio.

Dear Dr. Kehoe,

I am enclosing with this letter translation of a recent report made by Professor Bordas and the Superior Council of Hygiene of France and submitted to the Minister of Health there. You will notice that the report is composed entirely of criticisms against the work done and the methods adopted by the British Committee on Ethyl.

There is a reference made in the report which I am attaching, to a report got out by M. Dauvergne who is Chairman of the Central Commission on Automobiles and Traffic. This M. Dauvergne is at the moment engaged in writing a second report for submission to his Council, and he is anxious to have any comments that we can offer on Professor Bordas's report, so that he can reply in some way to the various points raised.

I should appreciate it very much if you would read through this report and let me have your comments just as soon as you are able, since the matter is somewhat urgent.

Sincerely yours,

T. R. A. BEVAN
