

July 11, 1971  
Tel. Call from:

Mr. Harold Davis

Ford River

Reverse Copper & Brass

Brooklyn, NY, (ZDA member)

FEL: EV9 5160

This company makes lead foil. Many  
of their customers convert the foil to Christmas  
tree tinsel. One of these has called  
Mr. Davis reporting that because of media publicity  
and the current fervor about childhood lead  
poisoning, their insurance company is either  
canceling or increasing premiums on their liability  
policy. I do not have the name of the insurance company.

LIA-76639

Mr. Davis recalled a similar situation

a year or more ago that directed the 208  
to start 79957

Paper Parcel to  
Stamford, Conn.

and that Dr. Roumas??? got out of this  
files a Boston, Mass. medical doctor who  
stated positively (??) that there was no  
hazard from ingesting the foil.

I have gone through as best I  
could the Roumas' files and can find no  
correspondence relative to this problem.
