September 22, 1977

Mr. Dick Jones, Senior Buyer
Westinghouse Electric Corporation
469 Sharpsville Avenue
Sharon, Pa. 16416

Dear Mr. Jones:

As you know, Monsanto will completely withdraw as a supplier of PCB dielectrics October 31, 1977. Concurrent with this withdrawal date, Monsanto will stop making available to askarel users the "Transformer Askarel Inspection and Maintenance Guide", Bulletin No. IC/FF-38R-2. Although operators of askarel transformers have used this askarel guide as a reference manual in the past, environmental regulations on PCB's are changing rapidly and have made the bulletin obsolete. This bulletin will not be updated. (May I suggest that you destroy all copies in your files and offices so we don't inadvertently supply obsolete information to the industry.)

If your company has ever used our bulletin as a supplement to your own literature, we want you to be aware of our decision. Equally, we ask you to note that in your own use of this bulletin you recognize that the last edition was issued August 1976. It should not be relied upon now or in the future.

Sincerely,

J. A. Alley
Industry Specialist
Dielectrics
