

NAPA Bearings. Another name for customer satisfaction.

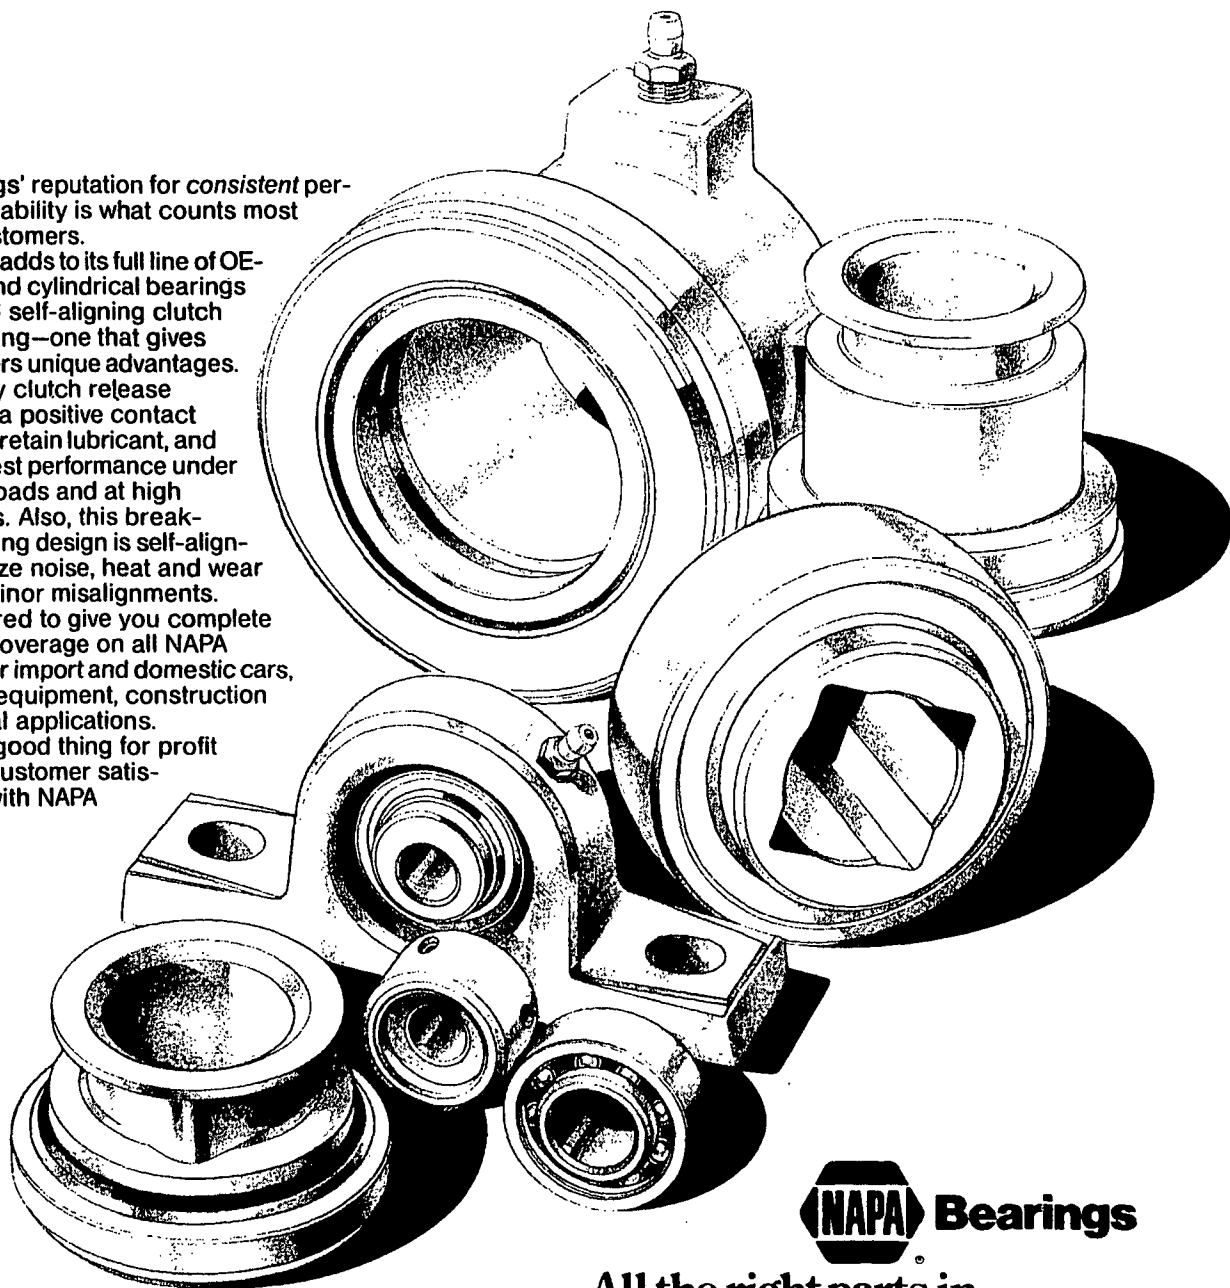

NAPA Bearings' reputation for *consistent* performance reliability is what counts most with your customers.

Now, NAPA adds to its full line of OE-quality ball and cylindrical bearings a new sealed self-aligning clutch release bearing—one that gives your customers unique advantages.

It's the only clutch release bearing with a positive contact seal to better retain lubricant, and ensure the best performance under demanding loads and at high temperatures. Also, this breakthrough bearing design is self-aligning to minimize noise, heat and wear caused by minor misalignments.

We're geared to give you complete application coverage on all NAPA bearings... for import and domestic cars, trucks, farm equipment, construction and industrial applications.

Go with a good thing for profit and lasting customer satisfaction. Go with NAPA Bearings.
