EIA Spill Plan

C. B. Sigler B1NC
D. Wood B2SD
B. R. Williams 1740
A. E. Leisy 1740

G. R. Sido
G4EC

Attached is a copy of a spill notification control plan prepared by a committee of the Electrical Industries of America.

You will notice on page 1 that they are specifying that Monsanto should mark our tank cars on sides and ends with four to six inch letters giving instructions on who to call in case of a spill. The purpose of this provision is to permit the message to be read at a reasonable distance in the event of an accident.

I do not know if four to six inch is the proper size letter. David Wood has indicated that if a smaller letter is appropriate, he will discuss that recommendation with the committee. Will you please give us your recommendation on how we can properly accomplish the committee's objective?
