

1 Milwaukee in the spring of '66, and actually read a
2 fair amount of it at that time.

3 Q Doctor, did Dr. Selikoff call for a ban of
4 asbestos?

5 A No. He pointed out it was still a very
6 useful product, and the job was to decide how to use
7 it safely. And obviously the levels of dust control
8 had to be more stringent than five million particles
9 per cubic foot.

10 Q Did they actually call for reduction in the
11 TLVs at that time?

12 A Yes, and the ACGIH, as of '68, proposed that
13 the level be reduced and, over the course of the '70s
14 and '80s, it was reduced even further.

15 Q All right. Doctor, was there an association
16 between exposure to amosite and chrysotile asbestos
17 and mesothelioma in the 1960s?

18 A No, not in the 1960s.

19 In fact, if you read the discussion part of
20 the New York Academy of Science symposium, there are
21 comments by South African pathologists in 1964 that
