

1 Dreessen's report was published, I think it
2 is called Public Health Bulletin 241, by the U.S.
3 Public Health Service, but a shortened version was
4 also published in the American medical literature in
5 1939 by Dreessen and Sayers.

6 Q It was there for labor or government to
7 see?

8 A Anybody that went to a library could look it
9 up and find it.

10 Q Doctor, as a result of these studies, did
11 you find anything in the medical literature which
12 suggested that the use of asbestos in either Britain
13 or America should be banned?

14 A No, banning was not recommended. Dust
15 control was the measure adopted.

16 Q Doctor, you mentioned -- you keep mentioning
17 the disease asbestosis during this time period.

18 Was there any mention of the disease
19 mesothelioma?

20 A Not at that point in history, no. That came
21 later.
