CO-OPTIMIZATION  
OF FUELS AND ENGINES

Gain critical technical information about global efforts underway to conduct research on both fuels and engines in a collaborative fashion to find the best properties that yield the cleanest and most efficient designs.

The inaugural SAE [Co-Optimization of Fuels and Engines Symposium](#) will bring together leaders from industry, universities, research institutions, and national laboratories.

#### Why Do You Need to Attend?

Presentations will include discussions of nearer-term opportunities to optimize properties of both gaseous and liquid fuels, including bio-derived and low GHG fuels. Delve deeper into conventional engine approaches such as spark-ignition and mixing controlled compression ignition. Increase your understanding of longer-term approaches such as low-temperature combustion (LTC) and multi-mode

solutions that include the use of conventional combustion approaches with LTC.

### **Collaborate on the Latest Technologies**

This forum is designed to foster more intentional discussion and cooperation across the international community on the latest research relevant to the light-, medium-, and heavy-duty sectors.

**Secure your spot and discount today!**

### **Mark Your Calendar:**

October 9-10, 2018

---

### **Venue Details:**

The Inn at St. Johns  
4405 Five Mile Road  
Plymouth, MI 48170

### **Event Resources**

#### Registration Discounts

Register by Sept. 21 to save \$100 & reserve your hotel room in the official SAE room block.

#### Exhibit/Sponsor

Make new connections through access to technical sessions, breaks, and networking.
