Due to many radio log changes at the beginning of the fall season, some of the stations have been tardy in relaying the news to The Herald. In order that Herald readers can rely on the accuracy of their radio logs, every effort is being made to get the correct information in time for each evening's paper. When it is not possible to do so, however, the letters T B A will indicate that the program is "to be announced." The radio log is a service to our readers. The Herald is trying to make it a good service.

Adequate Supply of Anti-Freeze Forecast

WASHINGTON (AP)—The government forecast an adequate supply of anti-freeze for motorists this winter despite increased military demands.

The National Production Authority said a survey shows well over 100 000 000 gallons have been produced for the cold season. This is more than two gallons for each vehicle.
