Subject: 答复: Shanghai Health Study... publications to date?

Dear Drs. White and Jarnot

I am sending you the 2005 invoice and some copies of the receipts again. I scanned the receipts, but they are too big to be sent by email. Would you pls tell me your fax number? I will sent them by fax.

As I should wait for university new semester and copy some receipts I am sorry delay to send the documents to you until now. I would grateful if you would tell me your comments and give me an acknowledgement when receiving this email.

Bese regards

Fu Hua

2. ?

Accepted, but not yet published (Journal?)

1. ?

Thank you - Bruce.

This document spells out the expectations of API and the Study sponsors with regard to the contract for supplemental funding to Cinpathogen for completion of the Shanghai Health Study. Consistent with the original scope of work for the Study and grant, the design, performance and conclusions of the Study are in the sole control of the principal investigators. The milestones laid out in this document are not intended to change that, or in any way to request or require divulgence of data or interim results to the sponsors or API prior to acceptance of manuscripts for publication in scientific journals. The purpose of requesting the milestone reporting set forth herein is for the sole purpose of allowing API and the Study Sponsors Oversight Committee to fulfill their obligations to monitor costs and the progress of the study, with numbers of cases reported and other factors used as benchmarks of study progress.

1. Short-term milestones to be achieved in the second quarter, 2007.

- a. In May 2007, provide an update of the numbers of AML and NHL¹ cases that can be used in the case-control study.
- b. Reestablish case accrual at participating Shanghai Hospitals
 - i. Within the new administrative structure, provide arrangements for continued review of original work history questionnaires by Dr. Otto Wong and his associates.²
- c. Continue necessary exposure assessment activities for completion of the job-exposure matrix
 - i. Complete Chinese literature reviews and simulation studies of key tasks by end of 2007.
 - ii. Complete methods comparison to assess potential inaccuracies in IPHS database exposure values by end of 2007.
 - iii. Complete monitoring campaigns as part of ME study by end of 2007.
 - iv. Provide quarterly reports on progress of above tasks to QA team (ongoing).
- d. Cooperate with the independent QA/QC team to fulfill the elements of the QA/QC team charter.

2. Long-term milestones to complete the case accrual work by the end of 2007 and the entire study by the end of 2008.

- a. Provide preliminary data and case counts
 - i. Provide to the University of Colorado or its designee as soon as feasible with an outside goal of mid-September 2007, a substantial but preliminary data set consisting of provisional or final diagnoses for AMLs and NHLs (depending on their status at the time of data migration) for which ICs are documented, and their matched controls, all questionnaire information and yes/no as well as categorical exposure information, if known.
 - ii. Provide an update of the numbers of cases that can be used in the case-control study in September, 2007.
 - iii. Provide an update of the numbers of cases that can be used in the case-control study in January, 2008.

¹ Defined here as the WHO classification for lymphoid neoplasms. Jaffe ES, Harris NL, Stein H, *et al.* Pathology and Genetics of Tumours of Haematopoietic and Lymphoid Tissues. Lyon, France, IARC Press, 2001.

² In cooperation with the independent QA/QC team.

- b. Provide to the University of Colorado or its designee by the end of June, 2008 a final data set consisting of all diagnosed and verified AMLs and NHLs and their matched controls, including subtype diagnostic classifications according to the WHO¹, and all questionnaire information for completion of the case-control protocol.
- c. Complete case accrual for AML by June 30, 2007, and NHL by December 31, 2007, that meet selection criteria previously outlined in previous proposals, most recently, the March 18th, 2007 proposal. It is understood that this includes a matched set of controls (2X), together with documentation of informed consents.
- d. Complete strategy for combining EA sources for development of job exposure matrix by end of February, 2008. Complete job exposure matrix for assignment of exposures to cases and controls by end of May, 2008. Provide results of job exposure matrix and links to study subjects by the end of June, 2008. Include the latter in the final data set.
- e. By November 1, 2008, submit for publication to appropriate scientific journals manuscript(s) presenting the findings of the DP protocol following the guidelines of the March 18th, 2007 DPME and previous proposals.
- f. By November 1, 2008, submit for publication to appropriate scientific journals manuscript(s) presenting the findings of the ME study following the guidelines of the March 18th, 2007 DPME and previous proposals.
- g. Implement the recommendations of the independent QA/QC team.
- h. Provide semi-annual progress reports to the SRP and ERP panelists, SHS sponsors and API. Included in the progress reports, in order to avoid divulgence of data or interim results, the update to SHS sponsors and API should only include a list of manuscripts actually published or accepted for publication.

Dear Dr. Jarnot:

After talking to Dr. Otto Wong last week and this week, I have agreed to continue to assist him in the case-control study of AML and NHL. Dr. Wong and I have agreed on the following two major items:

(1) I will continue as a Principal Investigator of the case-control study.

(2) My group at the School of Public Health (administrative assistant and research assistants) will assist Dr. Wong in the following activities:

- Monitoring of patient accrual (2007).
- Monitoring of patient interviews (2007 and 2008).
- Assist Dr. Wong in QA/QC when he works in Shanghai (2007 and 2008).
- Literature review of risk factors of AML and NHL (2007).
- Data management and analysis (2008).
- Report preparation (2008).
- Manuscript preparation (2008).

Attached please find our budget estimate for 2007 and 2008. Payments are to be made on a semi-annual basis (50% of the 2007 budget on 30 June 2007 and the remaining 50% on 31 December 2007, 50% of the 2008 budget on 30 June 2008 and the remaining 50% on 31 December 2008). Also attached is a letter from Dr. Jiang Qingwu, Dean of School of Public Health, Fudan University, reaffirming my role in the Shanghai Health Study.

To avoid any disruption of Dr. Wong's work in the case-control study, we have been providing assistance to him without a contract or funding. However, we will not be able to do so for much longer without a formal contract and proper funding. Therefore, I would appreciate it very much if you could reach a decision on our proposal by the end of June 2007.

If you have any questions regarding this proposal, please do not hesitate to contact me.

Sincerely,

FU Hua, Ph.D., MB
Deputy Dean and Professor
School of Public Health
Fudan University
