VINYL CHLORIDE EXCURSION SAMPLE

The results of your Vinyl Chloride excursion sample on 4-5-86 while disconnecting the ship METTE THOLSTRUP was 5.20 ppm. While this is above the ceiling of 5 ppm, a fresh air mask was used by you, so that this is not an actual respiratory exposure to Vinyl Chloride.

You may make arrangements with our medical department for a physical, if you so desire.

E. J. Singleton
Industrial Hygiene
Railroad/Marine
