P. Connor

SUBJECT CHICAGO LEAD LAW

D. W. E.
APR 20 1972

We would like to recommend that consideration be given to the following priority list when the Research Center examines our solvent materials for possible reformulation to conform to the .06 lead requirement stipulated by the Chicago Law:

1. Painter Alkyd Flat
No. 510-W-17103 (Regional Special)
2. Spred Gloss
(Entire line including Y-998 and Y-999)
3. Spred Lustre
4. Glid-Guard Alkyd Industrial Enamel
5. Spred Urethane Florenamel
6. Y-5700 Glidden Alkyd Floor Enamel
7. Y-5086 Alkyd Eggshell Enamel
8. Y-5099 Eggshell Stippling Enamel

No doubt these are all under review right now, however, the above materials are ranked in order of importance for our Chicago Dealer and P/M markets.
