SUBJECT : LETHAL SERVICE GASKET APPLICATION

REFERENCE :

TO : G. L. Bragg
L. Reed

Attached are the specifications for the now approved spiral wound gasket that will be used as the primary lethal service gasket for 150# systems.

Our approved GHE gasket may still be used in these systems and also where special gaskets require the use of GHE.

A training session for all trainers will be held before the gaskets are in the field for use.
