Subject: [EXTERNAL] Without Texas Oil, the 4th Goes Dark

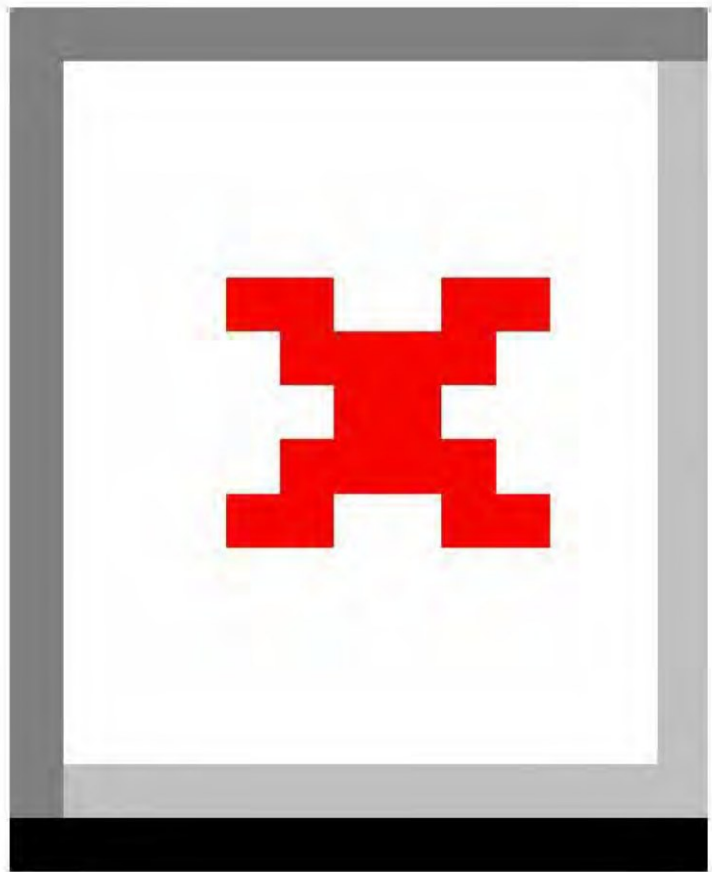

Eric --

This Independence Day, millions of Americans will gather to celebrate our nation's freedom. And while fireworks light up the sky, most won't realize the essential role the Texas oil and natural gas industry plays in making that celebration possible.

Texas oil and gas doesn't just power your Independence Day... it powers our entire nation's energy independence.

[Add your name to support energy made in America.](#)

SIGN NOW

Here's how:

Many materials used in fireworks—from casings and stabilizers to certain color compounds—are made using petrochemical products. These byproducts of oil and gas refining are key to producing and packaging modern pyrotechnics.

Without them, there's no show.

Texas oil and natural gas also fuel homes, industries, and transportation across the country.

Our industry supports over 490,000 direct jobs, contributes over \$27 billion in state and local taxes, and provides the resources that make American energy independence possible.

This 4th of July, stand with the industry that fuels our freedom and keeps America strong.

Sincerely,

Team TXOGA
