Wow!

On Tue, Jan 23, 2018 at 11:01 AM, Steve Davis <Steve@spacex.com> wrote:

Per the anecdote from earlier...NPS' response was:

The existing white color of these structures provides too much contrast with the surrounding environment and we would like to discuss a earth tone color instead.

Subject: RE: SpaceX Texas Launch Site - Change to Undertaking_PA

All,

To assist with the process and evaluating viewshed, our team sent in some pictures of the currently installed antenna (41 feet tall) from 2 places:

1. The eastern edge (closest to antenna) of the NHL (1.4 miles away)
2. The National Historic Marker (7 miles away)

The antenna is invisible from the Marker and a spec from the NHL (on pages 2 and 4, we added a red arrow to point it out).

For scale on the former, this is equivalent of looking at a laptop screen across a football

field.

Please let us know if additional pictures would be useful.

Thanks,

Steve

All –

Attached is a letter that outlines a proposed change to the Undertaking per the SpaceX Texas Launch Site Programmatic Agreement. We are asking for comments back by March 10th. Please let me know if you have any questions.
