Re: Requested Extension for Responding to the EPA's Section 114 Information Request

Dear Jimmy Hobby:

The U.S. Environmental Protection Agency Region 4 is in receipt of the electronic mail dated December 19, 2024, in which Westlake Chemical Corporation (Westlake) is requesting an extension of time for responding to the EPA's December 5, 2024, request for information. The EPA's information request letter was transmitted by electronic mail to Westlake on December 5, 2024, and a response is due to the EPA by January 6, 2025.

The EPA understands that the responses to questions 1, 8a and 8b, 9e, 10e, 11f, and 14 will be provided by January 6, 2025, and Westlake has requested more time to provide responses to the remaining questions. At this time, the EPA is granting a 30-day extension for Westlake's response to the request for information specified in the remaining questions; those responses are now due by February 5, 2025. In addition, the EPA will schedule a call with Westlake for the week of January 6, 2025, to further discuss the information request and Westlake's progress in developing responses. The EPA will consider whether any further deadline extension may be necessary at that time. Should you have any questions regarding this letter, please feel free to contact Andrew Mills by telephone at (404) 562-9030 or by electronic mail at mills.andrew@epa.gov.

Sincerely,
JASON
