

Technical Affairs Committee

J. C. Jackson, President

DATE April 13, 1981

SUBJECT

TAC-01-80
A/C Pipe Lining: Criteria & Options

Action Required: Review draft report and return letter ballot by 5/13/81

Attached along with a letter ballot is the final confidential draft report for TAC-01-80, A/C Pipe Lining: Criteria & Options. Please review and return the letter ballot to Staff by May 13, 1981. Include with your ballot suggested revisions, if any, plus recommendations which you believe Staff should make in its transmittal letter to the Public Affairs Committee and Board of Directors.

At this juncture, this program falls solely under the jurisdiction of the Technical Affairs Committee. Thus, internal corporate review need not include you PAC counterpart or Board representative. Both will be recipients of the final report. Lastly, the faster you can return your comments and ballot, the sooner they will receive their copy.

This TAC program is on schedule, let's all make a personal effort to make sure it doesn't get side tracked.
