

The new kid on the block fits right in.

Meet the new axle from Eaton... 25LD-501. A square beam axle, rated at 25,000 lbs., with Single Anchor Pin Brakes. It fits in either as a tag or as a trailer axle. It also fits right in with a reduced parts inventory because its shoes, linings, rollers, springs, wheel bearings, seals, spindle nuts and hubs and drums interchange with other

popular Eaton® Drive Axles. If you need a higher capacity axle than the familiar J-501 Trailer Axle and maximum parts interchangeability, introduce yourself to the new kid on the block. It fits right in. Eaton Corporation, Truck Components, 100 Erieview Plaza, Cleveland, Ohio 44114.
