April 18, 1974.

Dear Sirs:

We have established the Poison Information Center at University Hospital as a joint effort between the hospital, the pharmacy, and the pediatrics department for the purpose of assisting physicians and non-physicians alike in the treatment of accidental poison ingestion cases. This service is beneficial to all in the San Diego County area as poisoning has become a major cause of injury and death in children. We do, however, find that more complete information is necessary than we now have at our disposal.

We realize the need to safeguard the identity of certain chemicals contained in these preparations. You may be assured that the information received will be used with due regard for protection of trade secrets. Our Center is staffed by professional persons, and they are familiar with the processes used in dealing with confidential matters.

Your cooperation in providing us with the ingredients of your products which are listed below will be greatly appreciated.

Sincerely yours,

Sylvia H. Micik
