Ryan and Tate: if it's not too late, we think we have a project for you to consider. It's on Clear Creek near Empire, CO. About an hour west of Denver close to I 70.

Let me know if this is still useful to you, and if yes we'd be happy to get on the phone and provide more info about it to see whether it's a good fit or not.

Regards, Steve

Hi Steve – 2 maps – one a close-up of Lion Creek and North Fork Empire Creek confluence just above the closest town of Empire, CO. The second shows where Empire is (red marker) relative to Denver.
