It is important that we now make firm plans on the recovery and/or disposal of used products. Will each of you plan to be present in B-303 at 9:00 A.M., Thursday, March 4, for this purpose.

Important issues to resolve will include waste incineration and total fluids reclamation requirements, individual and customer actions required ahead.

A proposed agenda is attached.

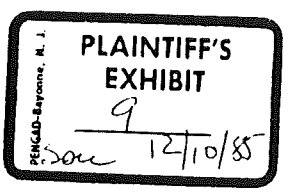

In the several days ahead please give particular thought to fluid and solids volume requirements, customer approach and Monsanto actions to meet the disposal/recovery need.

If there are agenda changes or a conflict in meeting time please let me know.
