6-7-71

ROUGH DRAFT

The Organic Division recognizes that the impact [redacted] its products, facilities and activities have on the environment will influence, at a rapidly accelerating pace, virtually every decision made in the Division including those concerned with what products are researched and developed, what type of product or service is sold, how the products are made, where they are produced, what type of facilities are used, how are they shipped, what markets are served, what assistance is offered to the customer, and what posture is assumed regarding relationships with governmental entities, customers, and the public.

To effectively coordinate the many activities in the Division relating to environmental impact the following assignments are made effective immediately.

W. B. Papageorge presently Manager, Environment Control, Polychlorinated Biphenyls, Specialty Products Group is appointed Manager, Environmental Protection. He will be responsible for coordinating all environmental activity in the Division relating to our products, both old and new, customers and suppliers. He will be reporting administratively to C. J. Smith, Assistant General Manager.

P. B. Hodges, presently Manager Environmental Engineering is named Manager, Environmental Protection, Manufacturing. He will retain his current responsibilities in the Manufacturing Department and will coordinate additional emphasis which will
