RE: Printouts of the NIOSH UC-2 Tape

Dear Rob:

This will acknowledge receipt of the 3 printouts from a comparison between the final NIOSH UC-2 Tape and the ER version tape which was sent to Nancy Wheeler in March 1983. The Printout #2 which indicates 8,314 work history records on the NIOSH tape, which does not appear on the ER tape, is the one of most concern to us at this time. I have given the printout to Mr. Claude Walton in our Computer Systems Department for analysis.

DCH called 9-12-83 and confirmed that these 8314 work histories were in fact missing

I do have a problem in that I have been unable to locate a copy of a generation of the NIOSH 2 tape with the file name TX. UPDATED. UCTWO. G0012V00, created day 259 of 1981. It would be helpful if the information is available to know if this tape generation in September 1981 was merely a copy of a previously created tape and who requested this particular tape generation. The rather extensive audit and updating of our final UC-2 tape received directly from NIOSH occurred in May of 1981. I am unable to find any record in my files where a copy of that tape was sent to either Van Durett or Nancy Wheeler.
