Subject: Little Hocking Investigation Workplan

Steve,

As per your verbal request to me approximately two weeks ago, please find attached a workplan to conduct a limited field investigation at the Little Hocking Water Association wellfield in the vicinity to TW-4.

We consider this investigation as a logical extension of the GIST directed activities defined in the MMCO under Task C: "Plume Identification Groundwater Assessment".

I will await your comment/approval of the workplan before moving forward with implementation. Please contact me if you have any questions.

Andrew
