Subject: Re: SHS Urgent Action for the BHRC TC

Jennifer & Stuart, Steve Bowes & I were the TC members on the BHRC

Oversight call today and so I accepted on your behalf the urgent action for the TC to review the technical aspects of Richard Irons proposal received

this week, and as soon as its available, the tech content/ tech milestones in Cynpathogen/ Fudan contract. Feedback from the TC is high priority and is needed ahead of the next week's Oversight meeting on Thursday March 29th.

I believe that you would want to progress this best through a TC conference call e.g. for Monday and Bruce is prepared to set one up immediately .

It was made very clear to all that it is critical to give this and other actions the highest attention/immediacy.

Please confirm to Bruce that he should proceed with setting up a call and communicating to the TC members the urgent need to review the technical coverage of the proposal (& contract).

Michael
