Mr. William Ludorf
Accessory Controls & Equipment Corp.
805 Bloomfield Ave.
Windsor, Connecticut

Dear Mr. Ludorf:

In answer to your inquiry concerning the lead content of Dulux® enamels supplied to you, I am listing the pertinent information below:

Product Number	Wt. % Lead Based on Solids
93-24673 Gray	0.36
93-203 Gray	0.36
93-53869 Gray	0.32
93-3430 Blue	0.31

The other two products, 93-27750 and 93-73496M are no longer manufactured by Du Pont; however, they probably contain about the same amount of lead as the above products.

The lead in these enamels is present at a level which is not considered toxic. In fact, the lead content is below the maximum of 1% allowed in paints for children's toys and furniture, and for interior surfaces.

If I can be of further assistance, please do not hesitate to contact me.

Very truly yours,

William W. Miller
Toxicity Coordinator
