| D. A. Olson             | DOLSO            |
| W. R. Richard           | WRICH            |
| J. C. Landwehr          | ANNISTON         |
| G. W. Miller            | ANNISTON         |
| J. T. Bell              | ANNISTON         |

J. T. Bell is certainly correct when he points out the contradictory nature of the reports on drum liner tests. I have re-read all of the reports and see no reason to proceed with Dalbon lined drums testing as I had previously suggested.

As we discussed, you will give me your recommendation on how we can best be prepared to meet foreign competition on a case basis by March 26th. You also suggested that we should find out ~~what our~~ true packaged quality is. I strongly endorse this idea -- we may have been assuming too much.
