

A. S. H. V. E. RESEARCH LABORATORY

Since 1919 THE AMERICAN SOCIETY OF HEATING AND VENTILATING ENGINEERS has maintained a permanent research staff and, since 1946, its own research laboratory at 7218 Euclid Ave., Cleveland 3, Ohio, devoted to the study of fundamental problems in the field of heating, ventilating and air conditioning. In addition to work at the Society's laboratory, a substantial part of the research program has been carried on through the medium of cooperative agreements with leading educational institutions of the United States and Canada.

All research activities are planned and supervised by the Committee on Research of 15 elected members, assisted by various Technical Advisory Committees of the Society. Since 1919, close to \$2,000,000 has been expended on research, which has helped guide the industry to better practice and equipment. Together with the co-operating institutions the Society has, during the past year, conducted 34 research projects including work on Panel Heating and Cooling, Solar Heat Gain and Shading Effects, Air Distribution, etc. The research activities are financed from Society funds, of which a portion comes from membership dues and from its publications, and these funds are amplified by contributions from friends in the industries engaged in the general field of heating, ventilating and air conditioning.
