PCB INCINERATION

C. Eaton

R. G. Potter

~~St. Louis 1960~~

D. L. Sliney

1. I attach a copy of the letter we send to customers inquiring about incineration of PCB fluids.
2. Also, attached is a copy of the label for return product waste and an advise note that we request be given to the carrier.
3. Companies who regularly make returns receive a wall chart to place in their shipping area to focus attention on good handling practices. I attach a reduced copy of the wall chart and a copy of the text.
4. We do have problems with return in bad drums from time to time, and J. C. Weber is developing a procedure to handle these cases.
