SUBJECT Asbestos in Molding Powder

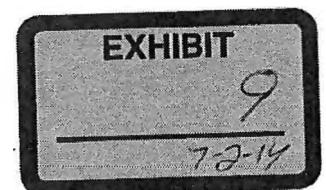

C.C. C. Ashley - PS
C. Junttila/B. Vosdingh

The last molding powder containing asbestos material was used up on January 8, 1980. This was Plenco 509-140 flow used on the inline presses. We are now using GE powder for these inline parts and they are our only approved source of asbestos-free inline material.

Bill Vosdingh is continuing to work with Plenco and Durez so they can develop an asbestos-free inline powder of sufficient strength. The latest Plenco samples were submitted to the lab for tests on January 3, 1980.
