Dear Ms. Hupp,

I have been provided your contact information as someone to reach out to with regard to potential changes in section 608. I am Vice President of Sales and Marketing for Bacharach Inc., a 100 year old Pennsylvania based company that designs and produced HVAC-R instrumentation focusing on refrigerant leak detection and combustion and emissions analysis. As such, we see the positive impact of the requirements of section 608 and the attention to refrigerant leakage in the following areas:

- Cost savings to the operators of refrigerated equipment such as food retailers through lower energy and refrigeration management costs, enhancing their profitability and sustainability
- Employment benefits to certified refrigeration contractors through enhance awareness and demand for their services and benefits
- Consumer satisfaction enhancements through the supply of effectively refrigerated and frozen goods throughout the refrigerated supply chain
- Business benefits to manufactures such as Bacharach that produce refrigeration leak detection and monitoring equipment to support the effectiveness of refrigeration management programs

It is my hope that you find this brief overview useful relative to ongoing considerations for changes to section 608. If you think I may be beneficial to you further in this area, please feel free to contact me directly. My contact details are noted in my signature lines below.

Thank you for your consideration. With kind regards,

Barry

Barry Phillips

Vice President, Sales and Marketing
