Dallas, Texas 75201

Attn: Virgil Doty

Enclosed are three samples collected using a Bendix 44 sampler pump on 0.8 micron filters. On December 19, 1979 I spoke with the secretary of the Environmental Health Laboratory and confirmed the price of $25.00 per sample for the analysis of asbestos using the microscope technic. The samples are labeled, B-Blank 2 and 3. If you need any further information please contact me at (512) 884-8863, ext. 233. Thank you for your assistance.

Very truly yours,

Norman Renfro
