

R+D160

Bestwall Gypsum Company

FOR PAOLI LAB.

DATE 3/2/59

FROM Acme, Texas

OFFICE

ATTENTION OF Mr. C. W. Lehnert

SUBJECT WHITE CERTEX

ANSWERING YOURS

Dictated by Dale Greve - cm

Attached is our Analysis Report on the 200 lbs. of Phillip Carey Asbestos referred to in your letter of January 26, 1959. This material was identified again as 7RF-9 instead of 7PF-7 which was requested. In view of the fact this material is finer than specifications thru the 50 mesh screen, do you still want us to try the sample batches using 7 or 8% to obtain the proper coverage and texturing properties.
