DOCUMENT DESCRIPTION: Memo - Environmental Exposure to Airborne Asbestos Fibers

Inter Office

Personnel and Organization Staff

April 10, 1973

Mr. L. E. Albrant
Division Safety Engineer
Industrial Turbine and Engine Division

Subject: Environmental Exposure to Airborne Asbestos Fibers

On July 7, 1972, the OSHA Standard for Exposure to Asbestos Dust became effective. This standard requires monitoring of employes potentially exposed to asbestos fibers. In order to implement this monitoring program, it is necessary for the Industrial Hygiene Section to be supplied with a list of plants using asbestos or asbestos laden material. This list should include the job titles, number of employes involved, and the type of asbestos material used.

Because of governmental compliance deadlines, it is necessary that this information be supplied as soon as possible or no later than thirty days from the date of this letter.

Henry B. Lick
Industrial Hygienist
Industrial Hygiene Section
