

January 15, 1948

Dr. Robert P. Sim,
Standard Oil Company of New Jersey,
15 West 31st Street,
New York City 19.

Dear Dr. Sim:

In accordance with my letter of December 15 I have made inquiry as I can into the nature of the illness of Mr. [REDACTED], an employee of your Company, whose illness [REDACTED] my attention some weeks ago. I have not been able to establish where and by whom the lead analyses were made in this instance, but the results were obviously erroneous, and it now appears that they provided the sole basis on which the diagnosis of acute plumbism was made. I send you herewith copies of the letters received from Doctors Morrissey and Buchanan. It is my feeling that these give all the information that is required and that this matter need be pursued no further. However, if there are any further developments in this case, or if there should be additional information available from any source, I shall be very grateful to have it in order to complete my records.

Cordially yours,

Robert A. Kehoe, M. D.
