
GEORGIA GULF CHEMICALS & VINYLs, LLC
ABERDEEN PLANT
SAFETY & HEALTH MANUAL

Subject: **Safety and Health Policy**

Code: ASHP 1 Revision: 4 Effective: July 1, 2000

Approved By:  Safety & Health Manager

Approved By:  Plant Manager

I. PURPOSE

This procedure defines and reaffirms the Georgia Gulf Chemicals & Vinyls, LLC Safety and Health policy at the Aberdeen Plant.

II. SAFETY POLICY

Georgia Gulf Chemicals & Vinyls, LLC recognizes that the preservation of human, material, and environmental resources is the ultimate purpose of any safety effort. Because of this, it is the policy of the Aberdeen Chemical Plant that every employee, including contract personnel, is entitled to work in a safe and healthy environment. This policy encompasses all aspects of Georgia Gulf Chemicals & Vinyls, LLC's safety effort including personal injuries, occupational health, property damage, fire protection, security, and compliance with government regulation and legislation. Safety efforts are established to support the long-term realization of safe production at the maximum level.

Compliance with the safety program and its rules and regulations is fundamental and a condition of employment at the Aberdeen Plant. Active support of, and involvement in safety programs is expected of all employees.

III. RESPONSIBILITIES

Each and every employee shares the responsibility and accountability for the continued safe operation of the Aberdeen Plant. Specific responsibilities are as follows:

A. Management Safety Responsibility

Management, through its authority to direct people and equipment, has an important responsibility to fulfill with regard to accident prevention. Of primary importance is the fundamental obligation to provide a safe place in which to work. This does not mean only safe plant conditions, but to provide by example and action, an atmosphere or environment that will result in safe operations.

III. RESPONSIBILITIES - Continued

A. Management Safety Responsibility - Continued

4. Unsafe conditions and acts are recognized and action is taken to eliminate them.
5. Job safety instructions are given for all jobs.
6. Potential hazardous job assignments are closely supervised to make sure they are completed safely.
7. Accidents are investigated and the causes determined and corrected.
8. Supervisors set good safety examples for their employees.

Supervisory employees are directly responsible for the safety of the personnel and operations under their control and supervision. This responsibility cannot be shared with any staff organization nor shifted laterally in any manner.

B. Employee Safety Responsibility

Every employee of the plant has a personal responsibility for accident prevention. They have a responsibility to their family, to their fellow employees, and Georgia Gulf Chemicals & Vinyls, LLC, by whom they are paid to work safely. In the performance of all duties, every employee is therefore expected to observe safe practices and instructions relating to the efficient and safe handling of all work.

Specifically, these responsibilities include, but are not limited to, the following:

1. To incorporate sound safety practices into every job and not to take chances.
2. To know and follow established safety standards and to use safety as a primary consideration in planning all work. This includes utilizing as a minimum the prescribed personnel protective equipment and additional protective steps as dictated by the job requirements.
