**Subject:** Joint Trade and Labor Union Power Plant RTR Letter  
**Attachments:** JointTradesMATSLetter\_Final.pdf

Dear Assistant Administrator Wehrum,

Please find attached here a letter from the electric sector (EEI, APPA, NRECA, CEG, the Class of '85) and the labor unions (IBEW and the Boilermakers) requesting that the U.S. Environmental Protection Agency complete the statutorily mandated Residual Risk and Technology Review (RTR) for power plants as expeditiously as possible. We note that a complete and robust RTR should recognize the capital investments already made for compliance and allow the industry to continue full implementation of the MATS rule. We urge EPA to move forward with an RTR for power plants and to leave the underlying MATS rule in place and effective.

Thank you!
