

ESKAY'S FOOD

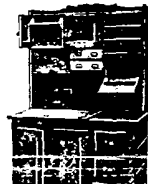

Lays the Foundation
for a
HEALTHY BOYHOOD

This is Spencer Williams, of Utica, N. Y. He is 4 years old and as strong and hearty as he looks. When he was 2, his father stated: "He has never had anything but Eskay's Food since he was 3 months old and he has always been in perfect health."

Eskay's Food perfectly modifies cow's milk, breaking up the tough, clumpy masses into soft, flocculent curds like mother's milk. It supplies the tissue building element and the heat and energy producing element, and when added to milk assures a perfect nutrient. This boy, as well as thousands of others in sturdy health, substantiates our claims.

Let us send you our book, "How to Care for the Baby," and generous samples of Eskay's Food for trial.

The Economy of Jap-a-lac

In ninety out of every hundred American homes there is a use for Jap-a-lac. It may be some time yet before Jap-a-lac will be used in all these homes, but at the present rate it won't be so long either. Last year we sold a quarter of a million dollars' worth, equal to more than 1,600,000 quarter pint cans. This is due to two things: first, to the economy of Jap-a-lac; second, to the advertising.

Jap-a-lac is the original floor finish, and high grade colored varnish. It comes all ready to dip the brush in, and anyone in the household, except the baby, can use it. It comes in twelve colors and natural—or clear—and may be used for a finish on floors, chairs, tables, bedsteads, picture frames, metal work, in fact anything and everything where a smooth and glossy finish is desired. It is tough, elastic and durable, may be washed with soap and water, and when used on the floor does not turn white under heel marks.

Oak, Cherry, Walnut, Mahogany, White—any wood finish you desire may be secured with Jap-a-lac. The Ox-blood, Malachite Green, and Blue, are for use in decorative effects where it is desired to follow a color scheme. There are special colors for metal work, refinishing old carriages, etc.

It costs about ten cents to transform an old chair or table into a handsome, stylish piece of furniture, by the use of Jap-a-lac. And you have the satisfaction of doing it yourself.

If you could come to us we would gladly give you a sample can of Jap-a-lac to let you try it. We will give you a can free as it is, if you will pay the cost of mailing it. Mention this magazine and send ten cents—the cost of mailing—and tell us what color you want. It will send the can of Jap-a-lac without charge.

We also send on request a booklet about Jap-a-lac, a beautiful color card, and a sample piece of wood showing the model floor finish. Please be sure to mention this magazine when you write.

There is but one honest basis for an extract of vanilla—the Mexican vanilla bean. It should be sun-dried after careful and expert cultivation. It should be packed and shipped as carefully as flowers. The best beans are worth from eight to fifteen dollars a pound, and it is these genuine vanilla beans that are used in making Vanduzer's Vanilla Extract. They are the basis of its pure, delicious, aromatic flavor. Don't let your grocer give you something cheaper. It will be cheaper to buy—last a change—no. Send for Free Catalogue.
