

August 3, 1961

Dr. John T. Kelly
1229 Second Street N.E.
Minneapolis 13, Minnesota

Dear Doctor Kelly:

We have found a total of seven cases of pneumoconiosis associated with the vermiculite industry in Minneapolis and we would like to assemble the X-rays of all seven in one place for comparison. I wonder if you would be kind enough to loan me the chest X-rays of Dennis Cleary taken earlier this year.

Yours truly,

W. E. Park, M. D.
Chief, Occupational Health
