Subject: Offshore Oil Drilling in America

Dear Andrew Wheeler,

My name is Ex. 6 Personal Privacy (PP). I am Ex. 6 Personal Privacy (PP) old and go to Ex. 6 Personal Privacy (PP) School in Norman Oklahoma. I oppose offshore oil drilling and here is why. We spend billions of dollars on things that hurt the earth, hurt the ecosystems, hurt the animals, and even hurt us. Oil wont even exist at one point and will run out. So that means were spending billions of dollars on a recourse that wont even be here one day. You could be spending that money on trying to find renewable energy that is better and cleaner than oil.

When we continue to spend money on these things all we're doing is putting our selfs in a deeper hole that we may not be able to get out of. Instead of spending billions of dollars on something that can hurt the earth, why don't we spend that on ways to fix what we've done to the earth instead of making it worse. Think about what we could do if we used that money on finding renewable recourses and creating a better environment for generations to come. I know that offshore oil drilling does have benefits or President Trumps Amenistration would not be proposing it, but make sure that you are completely aware and informed of the consequences that may come with it.

As a United States citizen I am using my right to voice my opinion and I hope that you take it into consideration.
