VISTA

Mr. Bill Still
Flexible Technologies
P. O. Box 888, Carwellyn Rd.
Abbeville, South Carolina 29620

Dear Bill:

This letter is a follow-up to my letter of 11/28 regarding the presence of vinyl chloride, cadmium and zinc in Vista 46801 PVC compound.

Vista has monitored personnel exposures to VCM while handling PVC compounds similar to this product and the results indicate generally non-detectable quantities of VCM in the air. Based on this, detectable quantities of VCM should not be emitted during normal processing.

In regards to potential emissions of cadmium and zinc compounds, based on the concentrations present and the physical properties of these substances we believe emissions would be non-detectable.

Sincerely,

Tom Grumbles
