REACTIVE CHEMICALS NOTE - VERSENE* BOILER WATER TREATMENT PROGRAM
AT POWER I

OVER THE PAST SEVERAL YEARS A PROGRAM HAS BEEN CARRIED OUT TO EVALUATE FIRST VERSENE 100 AND CURRENTLY VERSENOL AG 120 AS ANTIDEPOSITION ADDITIVES IN THE BOILER FEED WATER AT POWER I. AT THE BEGINNING OF THIS PROGRAM, BOTH REACTIVE CHEMICAL DATA AND PILOT PLANT DATA GENERATED BY STEVE WALLACE AND PROVIDED TO US IN 9/83 WERE REVIEWED. THE VERSENOL AG 120 PROGRAM WAS REVIEWED WITH ME BY HAROLD CHAGNARD IN 6/85, INCLUDING PRODUCT REACTIVITY DATA PROVIDED BY TOM SMUCKER OF BETZ LABORATORIES.

I FEEL THAT THE CAREFULLY CONTROLLED CONDITIONS UNDER WHICH THESE PROGRAMS ARE BEING ADMINISTERED PRECLUDE THE POTENTIAL FOR REACTIVE CHEMICAL PROBLEMS.

W. B. HORTON, JR.

FORMER CHAIRMAN, REACTIVE CHEMICALS COMMITTEE (REPLACED 11/85)
