PLAINTIFF'S EXHIBIT

CEL-1262

BEFORE THE NORTH CAROLINA INDUSTRIAL COMMISSION
I.C. NO. 849624

JOHN ALLEN KENNEDY, *et al.*,

Employee-Plaintiffs,

vs.

HOECHST CELANESE,

Employer-Defendant.

DEFENDANT'S RESPONSE TO THE OCTOBER 16, 1998 ORDER OF THE INDUSTRIAL COMMISSION COMPELLING FURTHER RESPONSES TO DISCOVERY

DEFENDANT, in further response to Plaintiffs' interrogatories and requests for production of documents and in response to the Order of the Industrial Commission compelling response to certain interrogatories and requests for production filed October 14, 1998, says:

1. Identify each of the following employees of defendant-employer since 1965:

(a) Industrial hygienists

(b) Safety directors

(c) Supervisors of asbestos abatement activity.

RESPONSE: See attached. Upon information and belief, there has not been anyone designated as a "supervisor of asbestos abatement activity." See responses to previous interrogatories and requests for production of documents.

2. Identify any and all persons involved in the development, creation or writing material cost estimates for the purchase of asbestos or asbestos insulation materials at the Salisbury plant.

RESPONSE: Upon information and belief, there has never been anyone identified to, or responsible for, the Salisbury facility specifically designated, as part of their job responsibilities, to develop, create or write cost estimates for the purchase of asbestos or asbestos insulation materials at the Salisbury plant. Upon information and belief, contained within the engineering job files, there may be documents related to cost estimates for particular work activities, which cost estimates might incidentally relate to asbestos insulation materials.

3. Identify person(s) who created, developed or wrote material cost estimates for the repair of pipes, boilers or other structures in the plant which originally (in 1965) contained or utilized in its structure asbestos-containing material.

RESPONSE: Upon information and belief, asbestos abatement documents previously provided to Plaintiff counsel might in some circumstances contain materials related to the cost of abatement of asbestos performed incidental to the repair of pipes, boilers, or other structures in the plant. Upon information and belief, engineering job files might contain incidental references to material cost estimates for repair of pipes, boilers, or other structures which utilized, when installed, asbestos-containing material. Except to the extent these same documents identify the person preparing the document, Defendant is not aware of any person designated, as part of their job responsibilities, to create, develop, or write material cost estimates for repair of pipes, boilers, or other structures which might utilize asbestos-containing material in its original installation.

4. Provide a list of the types and brands of insulation materials utilized in the original construction of the Salisbury plant.

RESPONSE: See responses to previous interrogatories and requests for production of documents. Upon information and belief, there are not now available any document or documents which list or identify the types of brands of insulation materials used in the original construction of the Salisbury plant.

5. Provide a list of insulation materials utilized in the Salisbury plant which were for insulation purposes subsequent to its original installation.

RESPONSE: See responses to previous interrogatories and requests for production of documents. Contained within the previous documents are references to insulation specifications. Contained within those specifications are references to various types of insulation used at the plant since its construction. Upon information and belief, there has not been located any document directed specifically to listing or identifying insulation materials, by name, utilized at the plants since construction, aside from the specification documents referred to.

This the 6 day of January, 1999.

HATCHER KINCHELOE
Attorney for Defendant

OF COUNSEL:
HEDRICK, EATMAN, GARDNER &
KINCHELOE, L.L.P.
Post Office Box 30397
Charlotte, North Carolina 28230
