Subject: Identification of Asbestos-containing Materials and Components Supplied to Ford Motor Company

Recent investigations by Ford have tentatively indicated that the components or bulk materials listed on the attached sheet contain asbestos, in the form supplied by your firm. As part of our effort to assess current asbestos use, you are requested to review the items listed and provide the information requested. In addition, if your firm supplies an asbestos-containing product that we have overlooked, please advise this office in writing, providing the same information for that product as is requested for the products listed on the attached sheet.

With the assistance of our suppliers, we are attempting to minimize the economic and timing impact of anticipated new asbestos usage and exposure limit regulations prior to their issuance.

Your cooperation in replying by July 30, 1980, will be appreciated. Please forward your responses to the address indicated on the attached form.
