C. A. D'ALONZO, M.D.
EMPLOYEE RELATIONS DEPARTMENT
MEDICAL DIVISION
WILMINGTON

In answer to your request of November 8, 1966, for information concerning the use of asbestos products at this plant, and exposure thereto:

- A. We have no full time insulators.
- B. One employee is a part-time insulator.
 - (a) Five per cent to ten per cent of the time.
- C. The three most prevalent types of insulating material used are:
 - (a) "Thermobestos" - Calcium silicate with asbestos fibers
 - (b) Fiberglas
 - (c) Cork filled mastic
- D. We do no spraying of insulating materials.
- E. We have had no cases of asbestosis, mesothelioma or carcinomas in insulators.
- F. Insulating material is cut with a hand saw, and no respiratory protective equipment is used, since hand sawing does not create a dusty condition.

C. W. STAHL - PLANT MANAGER
